

# St. Helens School, Vincent Street, Swansea

## Homezone & School Playground Consultation

RIGHT: Play areas near to or part of school grounds alongside traffic calmed roads. (Holland, Germany and Spain)

ABOVE: Play equipment within school grounds, visible from adjacent homezone street. (Bristol)

ABOVE: Decorative school gates and benches - good messages for visitors and pleasant places to sit and wait near to school entrance. (Tufnell Park, London)

ABOVE & LEFT: Shared surface street spaces change the emphasis from cars to people and make it possible to sit and chat with neighbours and friends.

ABOVE: inside and outside the school playground - A fortress from the outside (wall and barriers), better once you get inside, but still a big sea of tarmac only broken up by benches, planters and a play-ship.

LEFT & RIGHT: Recently completed homezones in Manchester; front gardens formed along pavement edges, new residents parking bays, repaved in good quality blocks, with street trees and bollards - it has been made very difficult to speed through these streets.
